Summary

Backend Engineer with 6+ years of experience building scalable async systems on AWS. Specialized in document processing pipelines, event-driven architectures, and AI-powered automation (GPT, Textract).

Professional Experience

Lighthouz AI Inc. (Remote)

Dec, 2024 – Feb, 2026

Sr. Full Stack Engineer

San Francisco, California

- Architected an asynchronous document engine using **AWS Step Functions (State Machines)** and **SQS**, processing over **500k invoices** within the first few months of operation.
- Developed a **Classify-Extract-Audit** pipeline using **AWS Textract** and **GPT-4o/4.1** to automate data extraction and logic-based auditing for unstructured carrier documents.
- Built the company's **React web application** and a matching **Outlook Add-in**, enabling users to execute the full product featureset directly from their inbox.
- Integrated core workflows with legacy **TMS/FMS** systems (Factorsoft, WinFactor, Tai, 3PL) by developing custom ETL adapters to normalize data between disparate APIs.
- Reduced the delivery-to-payment cycle for brokers by **24+ hours** and enabled **same-day payment** for factoring firms by automating manual document verification.

Savor Operations - Formerly Dashy Dash (Remote)

Oct, 2022 – Aug, 2024

Lead Backend Engineer

San Francisco, California

- Reduced invoice processing time from days to minutes by developing scalable pipelines and user-friendly Retool applications, enhancing processing time by 99.83%.
- Optimized deployment across multiple AWS accounts by managing cloud infrastructure with Terraform, including Django on ElasticBeanstalk, Lambda functions, Glue Jobs, and AWS OpenSearch.
- Automated builds, tests, deployments, and Slack reporting via GitHub Actions, enhancing code quality and maintenance.
- Designed scalable AWS solutions, including EDI support, weekly wrap-up emails, and vendor integrations (ClickUp, Zaru, Impira). Developed AI-based integrations using OpenAI models.

Cilans Systems Pvt. Ltd. (On-Site)

Oct, 2020 – Sept, 2022

Senior Software Engineer

Ahmedabad, Gujarat

- Provided scalable backend solutions across various client projects.
- Led migration from monolith to microservices for Costa Coffee's Storefront Microservices using NestJS, TypeScript, KafkaJS, and GraphQL.

CSE, IIT Bombay (On-Site)

Jan, 2020 – July, 2020

Deep Learning Research Intern

Mumbai, Maharashtra

- Document Text Parsing using OCR and Deep Learning Techniques for E-KYC.
- Building robust Text Image based Classifiers for detecting the right type of documents with thorough Module-wise Analysis.

Projects

- Developed **Merge-PDF** – a CLI tool in Python using PyMuPDF, for merging PDFs, Epubs, and images with customisations, achieving 21K+ downloads. 

Technical Skills

- **Languages/Frameworks:** Python, Go, JS; DRF, Flask, FastAPI, NestJS, Express, React.
- **Infrastructure/DevOps:** AWS (Step Functions, SQS, Lambda, Elastic Beanstalk), GCP, Terraform, GitHub Actions.
- **Data/AI:** PostgreSQL, MongoDB, OpenAI (GPT-4o/4.1), AWS Textract, Redis, Kafka.

Education

B.Tech in Information and Communication Technology

Aug, 2016 – June, 2020

School of Engineering and Applied Science, Ahmedabad University

Ahmedabad, Gujarat

CGPA: 3.00/4.00
